

CCTV Monitoring

Protect your property and staff through **LIVE CCTV Monitoring** 24 hours a day

This includes 3 routine Patrols per day. - any additional Patrols can be negotiated.

Costs will depend on the amount of cameras

Our CCTV surveillance systems are simple to use, simple to export relevant data and still provide outstanding image quality.

You can monitor your own property from anywhere with a broadband/WIFI connection with our remote surveillance options either over a PC or a smart phone. Please note the site must have a fixed IP address.

In business today, video surveillance provides a valuable insight into your operations that would otherwise be unattainable and should be a vital part of your security plan. In addition to providing a visual record of incidents at your company premises, the presence of surveillance cameras can be a powerful deterrent alone.

CCTV Systems range in size from 1/2 cameras to 16/32 cameras. Product choices also include transceivers from Adpro or Heitel that transmit live and recorded video to our 24Hr Monitoring centre in the event of an alarm. Using real-time video the Monitoring Team makes fast decision to protect your employees and your business, even when you can't be there.

We will respond to all camera activations when system is armed by informing keyholders and warning trespassers if there is a loudspeaker connected. We will also contact the Gardai if the system is certified for Garda response.

2 patrols are done per night every night, this is to verify the system is fully operational. If not we will action to keyholder. 1 extra patrol is done during weekend and Bank Holiday days totaling 3 patrols in 24 hours on weekends and Bank Holidays.

We will PING the IP address to ensure the system is online every 30 mins.

A surveillance system is only as good as the company that stands behind it. We will be with you from design and installation to ongoing service and support

How does the process work?

Cameras protect your property detecting any intruders on your site. When the perimeter is breached, live footage of the break-in is transmitted to our 24 Hour Monitoring centre. Our operator instantly responds and issues an Audio warning as the incident is being monitored and recorded. In 95% of cases, personalized vocal warnings are proven to deter criminal action and the criminal usually moves off. If the Criminals choose to ignore the warnings received the operator will quickly guide the Gardai to the exact location of the Intruders.

Who Benefits from CCTV Monitoring?

Factories and Warehouses

- * Detect and Prevent intrusions
- * Monitor abnormal activities (Staff Returning after hours)
- * Protect the Keyholder through live monitoring of the situation

Construction

- * Protect equipment and plant from theft and damage
